Dale, Treasure Island is one of the Navy sites that is not in my group. David Stensby works for Loren Henning. Loren oversees lots of federal facility sites as well, including Air Force, DOE, and a few other Navy sites. I'm happy to talk with you, but it's probably best to talk with Loren since he follows TI issues more closely.

I've copied him on this email so you have his email address.

Thanks,

John Chesnutt

Subject: Treasure Island

Hi John,

I just finished reading the HRA STM and noticed that EPA was commenting on it (David Stensby). so I thought I ought to drop you a note about something that has come up for the base.

I'm a long time RAB member on the Treasure Island Board and I was approached recently by a senior scientist at Lawrence Berkeley National Laboratories (DOE) looking to meet with the stakeholders at TI, concerning radium contamination. He asked for my help. As you are in charge of West Coast base cleanup I felt it would be best to talk to you and you could determine who would be most appropriate for him to talk to or to just alert you to what's possible to keep you informed. I would like to speak with you very briefly about his offer. If you will let me know what your availability is, I would call you at that time. It won't take long. I'm quite excited about these prospects.

Dale Smith
